

Puckett's® Holiday Reheating Instructions

All reheating temperatures and times are for a pre-heated oven. All temperatures are in Fahrenheit. Times may vary based on oven style and amount of food you are reheating. All reheated food needs to reach an internal temperature of 165°. If the desired internal temperature does not reach within the initial time, continue cooking in 10-minute intervals until 165° is reached.

Whole Turkeys, Turkey Breasts and Spiral Hams

Take out of the refrigerator 1-1.5 hours ahead of time. Place in a glass or foil oven-safe reheating pan. Place 1 cup of water in bottom of pan to retain moisture. Cover with foil and reheat in a pre-heated 350° oven until internal temperature reaches 165°.

Foil can be removed for final 10 minutes to allow browning and skin to crisp

Whole Small Turkeys reheat 45-60 minutes

Whole Large Turkeys reheat 60-80 minutes

Turkey Breast reheat 30-45 minutes

Spiral Ham reheat 30-45 minutes

Pulled Pork BBQ, Beef Brisket and Baby Back Ribs

Place in a glass or foil oven-safe reheating pan. Cover with foil and reheat in a pre-heated 350° oven until internal temperature reaches 165°, turning halfway through the cooking time. For ribs, place directly onto a baking sheet unwrapped, uncovered

Pulled Pork BBQ reheat 20-25 minutes

Beef Brisket reheat 20-25 minutes

Baby Back Ribs reheat 10-15 minutes

Sides

All sides can be microwaved in a microwave safe container: however, for optimal flavor and texture we recommend reheating in the oven, in an oven-safe container. Preheat to 350° and stir occasionally during the reheating process.
